

Cancer Prevention and Control (CPC) Seminar

EPI 696B

Wednesday, October 14, 2015

9:00 am

(Bagels and Coffee will be served)

UA Cancer Center – Kiewit Auditorium

***“Diet, Lifestyle and the Compression of
Cancer Morbidity and Reduction of
Cancer Mortality: Evidence from the
Singapore Chinese Health Study”***

Andrew O. Odegaard, PhD

Assistant Professor
Epidemiology, School of Medicine
University of California, Irvine

Presentation Summary: This seminar will discuss the “Compression of Morbidity” paradigm as it relates to cancer and present data from the Singapore Chinese Health Study that tests the hypothesis that a healthier diet and lifestyle is associated with an extended period of life cancer-free, as well as a reduction in cancer mortality.

If you wish to view this presentation live or at a later time, you may access the video at <http://webcast.ahsc.arizona.edu>. Click on ‘Centers of Excellence’ then “Arizona Cancer Center.” On that date click on live seminars or at a later time, scroll to the date desired.
